

FUNCEME - COSPAR TRAINING AND CAPACITY BUILDING COURSE ON EARTH

Observation Understanding of the Water Cycle (Over Land and Ocean)

FUNCEME will host a COSPAR Training and Capacity Building Course in the field of Earth Observation for improving our understanding and observations of the Water Cycle from space. The significance of Water Cycle Studies, the current applications from AVHRR-NOAA, SeaWiFS/MODIS/MERIS and CBERS, LANDSAT, and the pioneering character of SMOS, SMAP and AQUARIUS missions, all will make this activity a paradigm of knowledge transfer and capacity building from experienced satellite Earth Observation scientists to highly motivated young scientists around the world.
